AI Manifest Editor

- Compatible with AppInventor - Updatable and configurable manually - Capable of combining different elements (AndroidManifest.xml, drawable, layout, layout-land, layout-port,.xml, and.png) into one.apk file - Supports positioning items using single, double and triple click - Supports the ability to increase the screen resolution after the images are being scaled - Supports orientation changes - Supports both right-to-left and left-to-right - Supports APIs 7-18 NOTE: You need to install the latest version of ADT plugin for this function work. This software was developed in order to be used together with it's main counterpart and it will determine when APK files are being published. However, users must note that this application needs to be installed on the same computer as the main one. One of the issues when working with APK files on devices with higher-resolution displays is the fact that the resulting images will automatically be scaled down to lower resolutions, such as 320x480 pixels. AI Manifest will help users scale and increase the resolution of the resulting images, in order to attain better usage on larger displays. Furthermore, the app's main functionality implements a dedicated editor, which will enable users to alter the settings by using a graphical interface, rather than coding. Additionally, you can use AI Manifest editor to change the app theme and label, deactivate the title bar and the full screen mode. While the APK is being built, you will be able to use AI Manifest editor in order to edit the generated AndroidManifest.xml file.
