Q: Node.js send an http request to a custom server I have the following code, `var http = require('http'); http.createServer(function (req, res) { res.writeHead(200, {'Content-Type': 'text/plain'}); res.end('Hello World '); }).listen(8000);` When i run it in the command line, it works as expected. However, if i point my browser to the default port 8000, i get a not available message. Is there any way i can ensure that my nodejs script will always be available at the given port? A: Check the server log. It will show you the actual problem. Q: Expression for everything before the first occurrence of X This is probably a trivial question but I didn't know the right search terms for it. In a regular expression I want to find the last occurrence of a specific character before a target element. E.g. for `[^#]` or `[^#]*`. Note the last occurrence here. That is "before the first occurrence of the #". In other words: I'd like to find the last occurrence of the delimiter before the first occurrence of the target element. (A quick test in a macro generator shows that I do not need the target element in the regular expression.) If I use a star, e.g. `[^#]*` then I get all the elements before the first occurrence of the #. Any ideas? (e.g. `[^#]*$` on awk.) A: Use a negative lookahead `(?!expression)` and the `$` anchor to assert end of line before the first occurrence of #: `^(?!#) ^` Start of string `(?!#)` Negative lookahead, make sure what follows isn't # # End of line `$` Assert position at end of line Q: Is there anyway to get data from datareader without using a while loop? I want to move from the while loop to LINQ, but it seems the framework doesn't support it. `private void btnReport_Click(object sender, EventArgs e) { SqlConnection tblconnection = new SqlConnection(HOSTNAME`

Before you can begin using brushes, you'll need to download Photoshop's free Brush Editor application. The following tutorials will teach you how to brush a selection, erase an area, blur an area, create a texture brush, fix color problems and even apply the Healing Brush.
