

Dear all, I have several cracks in my mdf ceiling and i want to remove the cracks only, so what kind of substance i have to use? and i want to have smooth and new ceiling as it is currently.. thank you in advance! If you are someone that is looking for a good software for round up and monetize your followers, I would recommend the RoundupWiz! It is a software that helps you to get a higher number of followers by using your Instagram account also can help with monetize that strategy! You can remove the username in the Instagram account. Hi, I am Zane, I'd like to share my experience with you guys. I'm selling online and eventually decided to use CafePress.ca for my t-shirt and contenta. After going through their tour and policies, I accepted them to process my payment. But, when it's processing day, no response at all. So, I contacted CafePress support (see the email below). Their reply is, "It seems like your order has not yet been processed, please check your payment history for further details." Is it true? What should I do? Mail Sent: Feb 20, 2014 Hi, I just checked my payment history with your credit card and it appears that your order has not been processed. It is likely that your order was canceled due to a technical issue. If this is the case, I'd like to help you with any issues you might have and would be happy to assist you further. You can contact us at: [email protected] or use the Contact Us page located on our website. Sincerely, CafePress Support I'm currently converting PDF files to PDF-Xchange format with the PDF-95 Converter, but need to apply a specific filter (Calliber Optic) to the PDF files before they are converted so as to view. The software will allow me to remove the PDF-95 Converter license file (.LSZ) and keep the converted file (.PDF-Xchange). The problem is that when I re-install the software, the original (unconverted).PDF file gets reconverted as the software will still look for the.LSZ file after re-installation. I don't want to remove the.LSZ file and then remove the software. What I want to do is to remove the.LSZ file when converting and
